THE LIMU COMPANY'S *First Year*

The Limu Company, headquartered in Lake Mary, FL, reported first-year sales results in excess of \$10 million and that distributor recruiting exceeded more than 25,000 distributors.

Company Founder and President, Gary J. Raser, said, "It's amazing what can be accomplished when you bring together a group of committed people with a common vision and a passion for making a difference. Sales have increased sharply in recent months and we're projecting a banner year ahead."

As the exclusive worldwide distributor of Original Limu™, a health and wellness drink made from limu moui — a sea plant from Tonga — the company started operations in March 2004 and is currently operating in Europe, Australia and Japan. Raser said the privately owned company is operating debt free and is expanding into more than 20 different countries. 

Correction: G. Mark Clary is the Director of Operations for TriStar Enterprises, not Aerus as stated in the April article "Big Ticket Items." The quotes utilized were in reference to
